

PROJECTS / INTERACTIVE INSTALLATION  
RANDOM INTERNATIONAL

## RAIN ROOM

*Random International have created a new work audacious and compelling: Rain Room surpasses all our expectations.*

At the cutting edge of digital technology, Rain Room is a carefully choreographed downpour – a monumental installation that encourages people to become performers on an unexpected stage, whilst creating an intimate atmosphere of contemplation.

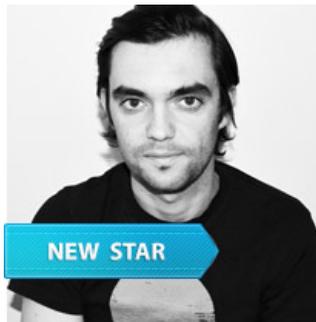

NEW STARS

PEOPLE & TEAMS / ARTIST  
RANDOM INTERNATIONAL

## hiWHIM NEW STARS: RANDOM INTERNATIONAL

*Known for their distinctive approach to digital-based contemporary art, Random International's experimental artworks come alive through audience interaction.*

Founded in 2005 by Stuart Wood, Florian Ortgrass and Hannes Koch, the studio utilises raw fragments of artificial intelligence to encourage relationships between the converging worlds of animate and inanimate.

UNSTABLE

## hiWHIM NEW STAR: UNSTABLE

*Marcos is the Director of UNSTABLE, a design and research laboratory that explores the social and political aspects of architecture in relation to the urban context.*

His work explores the medium of light projection on urban public space as a means to question the oppressive mechanisms of control implemented in the city.

Through the use of technology, multi-disciplinary collaboration, and citizen participation his interventions challenge the limitations of urban public space and provide opportunities for debate, autonomy, and interaction with the urban

PROJECTS / INTERACTIVE  
INSTALLATION / PORTABLE  
RIVER

## PORTABLE RIVER: a river of water to the center of Caracas...

*... we had to package it and lay it at rest, quite an unusual thing, because there it is normal to see it overflowing the streets every time it rains.*

We wanted to stop it for one night so that people could sit down and admire its beauty and perhaps, think about the value of this element, essential to life. The challenge presented in bringing it closer to the citizens, especially in the big cities. We created our own flow of crystal clear water packaged in 2,000 transparent bags, inside of which, in addition to light, we included samples of the life that
