

**Civil Engineer / Technical Architect**

**Civil Engineer / Technical Architect, Random International**

Permanent contract, full time

For immediate start

Salary £28,000- £32,000

This is an exciting opportunity to join collaborative art studio Random International and play a leading role in **project managing** and delivering a complex and highly technical interactive art project in museums, art foundations and galleries around the world. The position requires excellent (written) project management skills, time management, analytical approach and technical understanding. With experience in Civil Engineering or similar, you will work closely with clients, their architects, senior designers, civil and automation engineers and technical project managers implementing complex site specific design concepts responding to design needs, meeting key delivery milestones and working within budgetary constraints. The role is based in our new premises in South London and will require international travel for installations and site visits.

**Role specification**

- Proven ability to understand, manage and resolve complex details in a construction environment as well as large scale projects
- Able to read, interpret, understand and manipulate technical and architectural drawings
- Demonstrable experience overseeing and being responsible for project delivery coordinating 5-7 parties.
- Confident in understanding construction information for projects of varying complexity.
- An understanding of how design compromises inherent to the execution of the installation are interrelated
- Hands on experience with site analysis and contractor administration
- Familiar with working on an architectural scale both in terms of size and in practice
- Experience in coordinating and specifying systems and parts
- Oversee in-house production of components (non-design)
- Experience of working with water treatment, pump or wastewater systems and integration will be advantageous but is not essential.
- Work with studio-wide project planning and review systems

**Personal specification**

- 2-3 years experience
- Degree in architecture, civil engineering, business engineering or related fields, preferably with a focus on project management
- Have a solid technical understanding of MEP systems
- Working on projects internationally, you will have a flexible approach to working hours.
- Excellent attention to detail and an ability to manage conflicting deadlines
- A natural problem solver; driven, articulate and resourceful

**Civil Engineer / Technical Architect**

**About Random International**

Random International is a collaborative studio for experimental practice within contemporary art. Founded in 2005 by Hannes Koch and Florian Ortkrass, the studio now includes a larger team in London (and Berlin). Questioning aspects of identity and autonomy in the post-digital age, Random International's work invites active participation.

**Applications**

Please email your CV and a cover letter (of no more than two pages) outlining your relevant experience, and provide details of two referees to Luke at [work@random-international.com](mailto:work@random-international.com). Your email subject should be '**Civil Engineer / Technical Architect.**'

Closing date for applications: **Sunday 15 October 2017**

We are looking for someone to start immediately and may start interviewing candidates before the application closing date.
